

UC 2.5 – Personal Data

Name	Progress Tracker
Summary	<p>Users can search and view information about fitness coaches, filtering by availability, cost, location, and fitness goal.</p> <p>User can see all the progress, steps and data he has record, such as water, weight, mood, calories/macros, progress in the gym, photos.</p>
Rationale	It would help users not only see the progress they have made over time but see how changes in workout or diets impact their mood and/or weight. It would also help them set and achieve goals with a more engaging and personalized user experience.
